Protection through Prevention.

- Alcohol-Free
- Moisture-infused foam or spray
- No cracking, drying or burning
- Does not degrade surfaces
- Parent, Nurse & Teacher Favorite

1

Tested and proven to help reduce bacteria that potentially cause disease.

2

Physician tested and approved.

3

Amplifies consumer defense against the threat of surface transmissible infections.

- Benzalkonium Chloride based
- Patented manufacturing process
- Enhanced Capabilities

PROTECTS LIKE NO OTHER

*Skin cells may be shed prior to 8 hours naturally or by abrasion.
Reapply as needed.

Instant killing action -
lasting prevention

8-HOUR DEFENSE™

MICROSURE 8 HOUR DEFENSE™

HAND SANITIZER

DIRECTIONS FOR USE

- 1 Place enough product in your palm to thoroughly cover your hands.
- 2 Rub hands together and allow to dry.
- 3 Note: Do not rinse or wipe off the hand sanitizer before it's thoroughly dry.
- 4 Our Product has been tested to be effective for greater than 8 hours. However, Skin Cells shed prior to 8 Hours naturally or by abrasion. Reapply as needed.

YOUR SAFEGUARD...

MICROSURE ALL PURPOSE CLEANER AND DISINFECTANT™

Virucidal - Bactericidal - Fungicidal

The traditional mode of action to combat transmission of harmful microorganisms on surfaces is to attack the germs with varying degrees of poisonous chemicals. These poisons are composed of alcohols, bleaches and acids, and are designed to target and destroy a microbe's outer membrane, resulting in a "chemical kill". Antimicrobial biocides are toxic compounds that are harmful to humans, plants and animals.

When a surface is coated with Microsure All Purpose Cleaner and Disinfectant, millions of "invisible", nanoscopic crystalline structures begin forming and bonding (with the surface), effectively forming a new surface. Resulting in a "mechanical kill", that will kill the cells of the bio threat trying to attach to the object.

PROTECTION THROUGH PREVENTION

- This newly mechanically modified surface is one that prevents adhesion, disrupts microbial communication and prohibits colonization, reproduction and proliferation.
- Microbes that are unfortunate enough to come in contact with a Microsure All Purpose Cleaner and Disinfectant modified surface, exhaust themselves, wither and die.
- Unlike traditional disinfectants, Microsure All Purpose Cleaner and Disinfectant stays in place long after you apply it.

**The material is approximately 4 Nano meters in size. The material has been developed in such a way as it creates "Crystalline Structures" which penetrates the cellular membrane.*

SERVISMED
Greater Prevention Products

1 Effective against the most common germs, including E.Coli, Enterococcus hirae, P. Aeruginosa and Staphylococcus aureus. As well as many viruses, mold and fungi.

1

2 Dries on any surface forming a covalent bond.

2

3 Leaves Hard, Non-Porous Surfaces Disinfected.

3

- Will not degrade or discolor surfaces not harmed by water.
- Multi-purpose cleaner that can replace many other cleaning chemicals combined.
- Compatible with non-bleach disinfectants.

**Instant killing action -
lasting prevention**

MICROSURE™

ALL PURPOSE CLEANER AND DISINFECTANT

microSURE
ALL PURPOSE
CLEANER AND DISINFECTANT

WARRANTY: All Purpose Cleaner and Disinfectant is an easy to use service that works mechanically to bond to all painted surfaces and protect against waterborne microorganisms.

- Virucidal
- Bactericidal
- Fungicidal
- Eliminates Mold
- Eliminates Algae

**CAN BE USED ON:
HARD AND SOFT SURFACES**

- Bleach-Free
- Alcohol-Free
- Ammonium-Free
- No Added Dyes
- No Added Fragrances

WARRANTY: All Purpose Cleaner and Disinfectant is a registered trademark of Federal Law to use this device in a manner inconsistent with its labeling. This device is not to be used as a registered disinfectant on any surface or environment that is in contact with the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or if contact with mucous membranes that which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this device in a manner inconsistent with its labeling. This device is not to be used as a registered disinfectant on any surface or environment that is in contact with the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or if contact with mucous membranes that which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body.

GENERAL CLEANING: On a clean dry surface, apply enough solution to adequately cover the target surface by using spraying application of your choice.

GENERAL CLEANING: Spray targeted area and let dry.

DISINFECTING, DEODORIZING: Pre-clean surface before application of product.

Apply product with a hand pump trigger sprayer, low pressure coarse sprayer, or preferred applicator of choice. Hold sprayer six to eight inches from the surface to be treated.

Spray area until it is adequately covered with the product.

No scrubbing necessary. Allow treated surface to air dry.

INDOOR SURFACES: Walls / Ceilings: Apply every 3 months, or earlier if needed.

Floors, rails, stairs, furniture: Apply every 3-6 weeks depending on frequency of human contact.

OUTDOOR SURFACES: Building walls: Apply every 6 weeks to 3 months, or earlier if needed.

Sidewalks, outdoor furniture, etc.: Apply every 3-6 weeks depending on weather conditions, foot traffic and frequency of human contact.

KEEP OUT OF REACH OF CHILDREN

CAUTION

See label panel for additional precautionary statements.

Net Contents: 1 Gallon

WOUND CARE

microSURE_™

Infectious Disease Management relies on both reducing the spread of bacteria, as well as creating an environment that makes bacteria difficult to grow. By creating a surface that makes it impossible for bacteria to grow and multiply on surfaces, the rate of infection will necessarily drop.

When a wound is coated with Microsure, millions of "invisible", nanoscopic crystalline structures begin forming and bonding (with the surface of wound), effectively forming a new surface. Resulting in a "mechanical kill", that will kill the cells of the bio threat trying to attach to the object.

First-Aid Antiseptic to help fight infection!

DIRECTIONS FOR USE

- Clean the wound and dry thoroughly.
- Using a clean hand, apply thin coating of microSURE to the wound and surrounding area. Let dissipate for 60 seconds.
- Allow microSURE to dry before applying any antibiotics, bandages, or dressings.
- Apply antibiotic, if directed by your physician. Otherwise, allow wound to dry for several minutes.
- Dress the wound as directed by your physician.

**For maximum results, re-apply every 6-8 hours, or as directed by your physician.*
